Build  Code

Why Build2Code ?

Build2Code is a collaboration of companies that provide a complete solution for you to market and sell Code for Sustainable Homes compliant products and services to key decision makers.

Wholebuild.co.uk hosts the articles, reviews, product details and links necessary to raise your business profile online.

Codewizard.co.uk puts your CfSH products and services in front of specifiers as they manage & deliver their projects.

The Code Store - specialist suppliers of products, services and solutions that comply with the Code for Sustainable Homes.

Over 20,000 visitors per month & growing

We have been using Wholebuild from the early stages and the results have been great. The team are very helpful and offer continued support, and are always doing their very best to go the extra mile! The site is straightforward; uploading and viewing information is uncomplicated. Highly recommend the website! A superb information and marketing tool all-round with a dedicated team on hand!

thecodestore.co.uk

Code compliant confidence

We only stock Code compliant products for inclusion in CfSH projects.

Buy-it-Now

For products that can be sold through the site, we offer unrivalled rates, service & product knowledge

Easy to navigate

All 32 Code issues are addressed in easy to navigate menus

Code Evidence or Specify button

Instantly create a PDF of your product - highlighting its compliance with Code criteria which can be used as evidence.

[The Code Store] has something of the Wow factor about it. Not only do you succeed in describing this complex picture in a manner that is clear and understandable but you then list the products to meet that criterion. In a nutshell I think you have made this complex subject understandable and resolvable. Brilliant!...

Geoff Wood MBA FRICS - BCO

Cracking the Code for Sustainable Homes

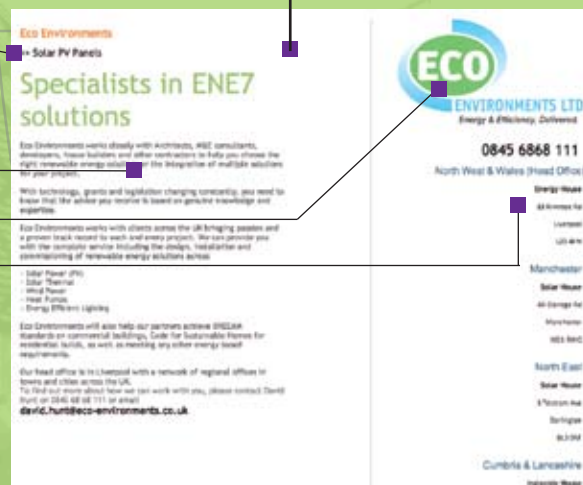

The leading project management system for Social Housing

Hundreds of Architects, RSL's & CfSH assessors registered and looking to specify products and services to meet compliance.

Microsite features:

- Up to 20 products listed
- With associated images and data sheets
- Company description
- Company and certification logos
- Up to 10 addresses and contact details

“

Codewizard helps our company to collect the myriad pieces of information needed for the assessor to submit our application to BRE Global for authentication. The traffic light system is particularly helpful and forms a useful platform for constructive dialogue with our Code Assessor
